A Path to Water Security for the Lower Flint River Basin

HABITAT CONSERVATION PLAN (HCP)

The most important result of GA-FIT will be a Habitat Conservation Plan, which will be a roadmap to provide water security for water users and natural systems in the Flint River Basin

Effective Drought Response Increased Ag Irrigation Efficiency

Better Understanding of Water Resource Capacity

Reduced Regulatory Uncertainty (ESA)

New/Expanded Water Use Where Resource **Capacity Exists**

Data Driven Adaptive Management

Protection of Aquatic Ecosystems & **Listed Species**
